INSTALLING THE APP

NoteAdventure on Android

Four steps to put NoteAdventure™ on your Android phone or tablet, and how to keep it up to date.

Not on Google Play? That's expected.

NoteAdventure is still being tested, so **it isn't on Google Play yet**. You install it straight from us instead. Your phone will ask you to allow that once; after the first time it won't ask again.

1 Download the app

On the phone itself, open this link:
https://storage.googleapis.com/notequest-beta/downloads/noteadventure-latest.apk

2 Download anyway, then open it

Chrome may warn the file “might be harmful”. It says that about any app not from Google Play. Tap **Download anyway**. When it finishes, open the file from the notification or your Downloads app.

3 Allow it, the first time

Android asks to allow installs from this source. Tap **Settings**, switch on **Allow from this source**, then go back.

4 Install, tap your email link, sign in

Tap **Install**. New here? Tap the link in your studio's invitation email (a teacher: the setup email) to set up your account. After that, open NoteAdventure and sign in.

Getting updates

Download the same link again and install it over the old version. Your practice and progress are kept: they live on our servers, and you stay signed in.

The app doesn't update itself, so keep this page or the link handy for next time.

If it won't install

- Check the phone has free space.
- **“App not installed”** or a conflict with an existing app: make sure you downloaded from the link above, then try again.
- **Blocked by Play Protect:** tap **More details**, then **Install anyway**.
- Very old Android versions may not be supported. Email us with your phone's model.

Stuck, or something not working? Email **issues-na@sniffsafarilabs.com**. A real person reads every one.
